Online Water Directory

A who's who of water organisations in Australia

Water Source

Water Source is the information hub for the water sector, and is the portal to all our available water information including articles, feature stories, podcasts, video interviews, and technical papers. It's also the place where we share content from our members.

Current Magazine

Current magazine is our bi-annual print and digital publication published in April and October. **Current** contains feature stories, in-depth articles, industry case studies, profiles of industry leaders, as well as the latest in scientific research and water policy.

Water e-Journal

The **Water e-Journal** is an online repository of high-quality technical papers on a wide range of water-related topics. All submitted papers are considered for publication in the **Water e-Journal**, with one-page executive summaries considered for publication in **Current**.

Online Water Directory

Our online Water Directory is a searchable directory of water-related products and services, as well as a who's who of water organisations in Australia.

Source e-Newsletter

Our weekly e-newsletter, **Source** is a summary of water resources, news and updates from our members. It also contains a listing of upcoming networking events for the water sector.

Digital Newsletters

Regular digital publications including **State Source** newsletters and **What's On** newsletters offer state-specific information to our members on the latest news, events and opportunities relating to their local water sector.

Social Platforms

Our social media platforms, including LinkedIn, Twitter and Facebook, allow members and the community to engage with the Association and with each other on all water matters.

Technical Events & Conferences

Conferences and seminars give you the opportunity to broaden your technical knowledge and learn from the expertise of industry leaders and professionals. This includes our largest conference and trade exhibition, Ozwater.

Webinars

If you are looking to enhance your knowledge but can't escape the workplace or make it to an urban centre, our webinars provide you with easy-to-access information no matter where you are. This is particularly well-suited to meeting the needs of our regional, rural and international members.

Mentoring

Share your expertise or learn from the experience of others

International Connections

Connect your Australian expertise with a growing international market

Partnerships

Connect and collaborate with other members

Ozwater Conference & Exhibition

Ozwater is the Australian Water Association's annual international water conference and exhibition, attracting over 4,000 delegates nationally and internationally. It is the largest gathering of water sector professionals in Australia and the best opportunity to build and expand your networks.

State & Territory Branch Events

Our Branches provide a high level of personal interaction and engagement with local members. Conferences, workshops and technical sessions address key issues for the local sector, while branch dinners and award evenings provide the chance for business networking and industry fellowship.

Specialist Networks

Specialist Networks are groups of individual members who work in water-related topics of common interest, allowing you to connect with like-minded professionals. Active involvement by members means we offer a platform for business and personal connections, building professional knowledge, and raising the level of discussion on targeted water issues.

Mentoring Program

Our mentoring program is a great opportunity for young people in the water industry to develop new relationships and skills from industry leaders outside their current organisation. On the flip side, it offers more experienced professionals the chance to develop skills in coaching and inspiring emerging water professionals.

International Program

Our International Program ensures that the expertise and experience of the Australian water sector is profiled and positioned to play a key role internationally. Relationship building is a central pillar of our international effort. We enable collaboration, information and skills exchange, inbound and outbound delegations, trade and business matching, as well as the facilitation of major water projects.

Australian and New Zealand Biosolids Partnership

We manage the Australian and New Zealand Biosolids Partnership (ANZBP), a member-based group consisting of organisations committed to the sustainable management of biosolids. The ANZBP provides information about biosolids; how they are produced; what is in them; how they might be used; their benefits and potential risks associated with their use. The Association and the ANZBP organises a national conference every two years.

Partner with us to inspire positive change in Australia and overseas

Australian Water Awards Program

We offer a range of awards at both state and national levels as part of our Australian Water Awards Program which plays an important role in promoting the contribution our members make to the industry and the community. The awards recognise the outstanding achievement of individuals and organisations in the water sector. Winners of state and territory awards become finalists in the national awards which are announced each year at the Ozwater Gala Dinner. Award finalists and winners are profiled significantly across our print and digital platforms.

Channeling Change

The Channeling Change Program recognises champions of diversity, inclusion and equality within the water sector. We provide platforms to discuss successful strategies and share resources to use within the workplace.

Member News

Our digital and print platforms are where we promote the news and achievements of our members. We can write news articles about your company's latest water projects, share your water resources on our social media pages, and update the rest of the industry on awards or bids you have won in our weekly e-newsletter, **Source**. Our **Current** magazine profiles the innovative work our members are engaged in across the sector, while our **State Source** newsletters profile local member news.

Presenter Opportunities

Our individual members have year-round opportunities to inspire positive change across the sector through submission of technical papers to state or national conferences, or our online technical paper publication, **Water e-Journal**. Presenting at Ozwater, our annual water conference, gives you the biggest opportunity to share your ideas and solutions on a national platform.

International Work

Through our international relationships we have outreach across more than 45,000 international water sector professionals from across 15 countries, providing opportunities for your company to inspire positive change on a global scale. Our international work involves public private partnerships, joint venture opportunities, and collaboration on major water projects. We create a platform for which Australian skills and capabilities can be easily accessed, utilised and shared globally. Our international programs include the Water Utility Improvement Program (WUIP), outbound delegations to Vietnam, Indonesia and Cambodia, demonstrations of Australian water technology in other countries, and business matching between the Australian water sector and overseas water sectors.
