

6 CLEAN WATER AND SANITATION

Ensure availability and sustainable management of water and sanitation for all.

One in three people live without sanitation. This is causing unnecessary disease and death. Although huge strides have been made to access clean drinking water, lack of sanitation is undermining these advances. If we provide affordable equipment and education in hygiene practices, we can stop senseless suffering and loss of life. We can provide support to rural and remote communities to ensure they have the technology and infrastructure to access clean water and the education to maintain it.
